INFORMED CONSENT TO OPERATION OR OTHER PROCEDURE

Vertical Sleeve Gastrectomy

PATIENT: __________________________ authorize Dr. John S. Weaver and/or such assistants as may be selected by him/her to perform:

Procedure: Laparoscopic Sleeve Gastrectomy.

An endoscopy will also be performed at the time of surgery.

I understand that the reason for the procedure is: For Weight Loss.

I acknowledge that no guarantees or assurances have been made to me concerning the results of the operation or procedure(s) and that the procedure may not cure my condition. I have had explained to me alternative methods of treatment and agree to the above surgical approach.

Alternatives include: Continued non-surgical or alternative surgical therapies and treatment.

2. I am aware that there are substantial risks and consequences that may be associated with any surgical, medical, diagnostic, or anesthetic procedure. The more common risks and hazards include: infection, bleeding which may require blood transfusion, nerve injury, additional surgery, blood clots, heart attack, allergic reactions, and pneumonia. These risks can be serious, extending hospital stay and possibly fatal. Some significant and substantial risks of this particular procedure include: (THESE ARE NOT PROBABLE RESULTS; THEY ARE STATISTICAL POSSIBILITIES.)

Inadequate weight loss, stricture, leak, reflux, injury to stomach and/or esophagus that may require re-operation or additional medical or surgical treatment. Anesthetic risks include pulmonary embolism, death, bleeding (possibly requiring transfusion, pneumonia, cardiac events including heart attack, stroke, and subsequent neurological problems, bowel obstruction (early or delayed), intra-abdominal abscess/infection, deep vein thrombosis (blood clots), adhesions bowel/organ/vessel injury, nerve injury. Injury to the liver and/or spleen is possible removal or repair of my spleen may be necessary. A need to convert to an open surgery may be necessary. Other risk related to the sleeve Gastrectomy include peptic ulcer, reflux disease, Incisional hernia, obstruction, stomach/esophageal/bowel perforation or leak, infection, abscess formation, erosion, internal hernia, and/or need for additional surgery or procedures.

I also accept the possible postoperative problems that may require re-operation.

3. I understand and acknowledge that by signing this form I am representing in writing that I have been fully informed to my satisfaction in general terms of the following:

   a. Potential benefits and drawbacks to this procedure
   b. Potential problems related to my recovery
   c. The likelihood of success
   d. The possible results of non-treatment

4. I recognize that, during the course of the operation, additional or different procedures other than those described above may be necessary. I authorize such procedures as are, in my doctor’s professional judgment, desirable to my health, including attempts to remedy any conditions that are not known at the time the operation is begun. An upper endoscopy is done at the time of surgery and I accept the risks associated with this including; dental injury, esophagus injury, or perforation (possibly requiring chest tube placement or thoracotomy – opening of the chest for repair/treatment), or injury to the stomach/mouth/ throat.

Transfusion of Blood or Blood Products

The doctor has informed me that the possibility of bleeding may occur which would require a transfusion of blood and/or one of its products. I understand that transfusions can be done with blood donated by others (homologous), from someone I choose (directed), or if I am the transfusion recipient, my own blood (autologous). I am aware that there are risks associated with transfusions as listed below, and that risks exist in spite of the fact that blood is screened for Hepatitis, AIDS virus, and Syphilis.
